EFIC

Efic Consultancy Ltd

Logo Guidelines

EFIC Consultancy Ltd · Version 1.0 · October 2026

The logo versions

One logo, four arrangements. Use the **primary logo** whenever there is room. Pick a smaller arrangement only when the space asks for it.

Primary (stacked) — the main logo: documents, cover pages, signs, profile pages.

Horizontal — wide, low spaces: website header, email signature, banners, letterhead.

Wordmark — EFIC on its own, when the full name is already nearby or the logo is small (stamps, pens, social posts).

Icon — very small spaces: browser tab, app icon, watermark. Never instead of the logo on documents.

Colour versions

Choose the version by the background, so the logo always stands out clearly.

Full colour on its own navy panel. Works on any background, including photos.

Navy and gold on white or light backgrounds (Off-White #F7F6F2).

White and gold on navy or other dark backgrounds.

All white: dark photos, one-colour printing on dark material, embroidery.

All navy: one-colour printing, stamps, light-coloured merchandise.

All black: fax, newspaper adverts, black-only printers, engraving.

Clear space

Keep an empty margin around the logo at least the size of **X** — the height of the capital E in “Efic Consultancy Ltd”. Nothing else (text, edges, other logos) goes inside it. The transparent files already include this margin.

Minimum size

Below these sizes the small words stop being readable. Switch to the next smaller version instead.

Version	Print (width)	Screen (width)
Primary (stacked)	30 mm	140 px
Horizontal	45 mm	200 px
Wordmark	15 mm	60 px
Icon	5 mm	16 px

Colours

The same colours as the EFIC website, letters and documents.

Navy

HEX #14213D
RGB 20, 33, 61
Main colour: the logo, headings, backgrounds

Gold

HEX #E7B165
RGB 231, 177, 101
Accent: the rule, highlights, buttons on navy

White

HEX #FFFFFF
RGB 255, 255, 255
Logo text on navy

Deep Navy

HEX #0F1A30
RGB 15, 26, 48
Darker backgrounds, footers

For printing, send the PDF files and ask the printer to match these colours and show you a proof first. Every printer converts colours slightly differently, so a proof avoids surprises.

Gold is for the rule and accents, never for text on white. Gold text on a white background is too faint to read, and white text on gold is too.

Fonts

Use	Font
EFIC in the logo	**Source Sans 3 Black**
“Efic Consultancy Ltd” in the logo	Source Sans 3 Regular
Headings on the website and documents	**Montserrat**
Body text in letters and documents	Calibri or Arial

The logo fonts are free (SIL Open Font License) and included in the **fonts** folder. You never need to type the logo yourself: always use the logo files.

Please don’t

The logo only works if it always looks the same. Use the files as they are.

Don't stretch or squash it

Don't change the colours

Don't add shadows, glows or outlines

Don't rotate it

Don't place it on busy backgrounds

Don't retype it in another font

Don't put the navy logo on navy

Don't crowd it: keep the clear space

Which file do I use?

Website (Blogger header, on the navy bar)	`web/blogger-header-reverse-600px.png`
Website on a white header	`web/blogger-header-positive-600px.png`
Browser tab icon (Blogger favicon)	`web/favicon.ico`
Phone home-screen icon	`web/apple-touch-icon.png`, `web/icon-192.png`, `web/icon-512.png`
Facebook, LinkedIn, X, YouTube, WhatsApp profile	`social/profile-picture-efic.png`
Cover / banner images	`social/*-cover.png`, `*-banner.png`, `*-header.png`
Email signature	`email/email-signature-white.png`
Letters, invoices, Word, PowerPoint	`png/primary/efic-primary-positive-1000px.png`
Printer, sign-maker, embroidery, merchandise	`pdf/ or svg/ (vector, any size)`
Edit a version in Inkscape	`inkscape/ (one file per version)`

File types

SVG	Vector: sharp at any size. Websites, Inkscape, designers.
PDF	Vector: printers, sign-makers, Word and PowerPoint (Insert → Picture).
PNG	Picture with a transparent background: anywhere that won't take SVG. Use the biggest size you need; never enlarge a small PNG.
ICO	The browser-tab icon.
